

Corrugated fibreboard — Determination of edgewise crush resistance (unwaxed edge method)

The European Standard EN ISO 3037:1996 has the status of a British Standard

Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee PAI/11, Methods of test for paper, board and pulps, upon which the following bodies were represented:

- British Apparel and Textile Confederation
- British Carton Association
- British Fibreboard Packaging Association
- British Printing Industry Federation
- Envelope Makers' and Manufacturing Stationers' Association
- Her Majesty's Stationery Office
- Institute of Paper Conservation
- Ministry of Defence
- Paper Federation of Great Britain
- Pira International
- University of Manchester Institute of Science and Technology

This British Standard, having been prepared under the direction of the Materials and Chemicals Sector Board (I/-), was published under the authority of the Standards Board and comes into effect on 15 March 1995

National foreword

This British Standard has been prepared by Technical Committee PAI/11 and is the English language version of EN ISO 3037:1996 *Corrugated fibreboard — Determination of edgewise crush resistance (Unwaxed edge method)*, published by the European Committee for Standardization (CEN). It supersedes BS 6036:1995 which is withdrawn.

EN ISO 3037:1996 was produced as a result of international discussions in which the United Kingdom took an active part.

EN ISO 3037:1996 has been approved by CEN member bodies under the weighted voting procedures introduced in 1988 to coincide with the introduction of the “New Approach” Directives from the Commission of the European Community.
