Cooperating organizations

The Petroleum Standards Committee, under whose direction this British Standard was prepared, consists of representatives from the following Government departments and scientific and industrial organizations:

- Chemical Industries Association
- British Lubricants Federation Limited
- British National Oil Corporation
- Department of Industry (National Engineering Laboratory)*
- Hydrocarbon Solvents Association
- Institute of Petroleum*
- London Transport Executive
- Ministry of Defence*
- Society of Motor Manufacturers and Traders Limited

The organizations marked with an asterisk in the above list, together with the following, were directly represented on the committee entrusted with the preparation of this British Standard:

- British Gas Corporation
- Institution of Gas Engineers
- Liquefied Petroleum Gas Industry Technical Association (UK)

This British Standard, having been prepared under the direction of the Petroleum Standards Committee, was published under the authority of the Executive Board and comes into effect on 30 June 1980

National foreword

This British Standard was prepared by PTI/12 and is the English language version of EN ISO 3735:1995 *Crude petroleum and fuel oils — Determination of sediment — Extraction method* published by the European Committee for Standardization (CEN). It is identical with ISO 3735:1975 published by the International Organization for Standardization (ISO).

The principal change from the previous edition of BS 4382 is the addition of stainless steel as one of the metals specified for the construction of the condenser.

CAUTION. Attention is drawn to the Health and Safety at Work etc. Act, 1974, and the need for ensuring that the method of test specified in this standard is carried out with suitable precautions.

The procedure described in this standard method is intended to be carried out by qualified chemists or other suitably trained and/or supervised personnel. Normal safety precautions should be observed throughout the use of the method. Attention is drawn in the text to some specific hazards.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN ISO title page, pages 2 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
