Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee PTI/10, Liquefied petroleum gases, upon which the following bodies were represented:

- British Compressed Gases Association
- British Fire Services' Association
- British Gas plc
- Chemical Industries' Association
- Department of Trade and Industry (Oil Division)
- Institute of Petroleum
- LP Gas Association
- Society of Motor Manufacturers and Traders
- United Kingdom Petroleum Industry Association

This British Standard, having been prepared under the direction of the Materials and Chemicals Sector Board (I/-), was published under the authority of the Standards Board and comes into effect on 15 March 1995

National foreword

This British Standard has been prepared by Technical Committee PTI/10, and is the English language version of EN ISO 4257:1995 *Liquefied petroleum gases — Method of sampling*, published by the European Committee for Standardization (CEN). EN 4257 was produced as a result of international discussion in which the United Kingdom took an active part.

Additional information. The United Kingdom participated in the preparation of ISO 4257:1988, but found it necessary to disapprove of the final text for reasons of safety (the single valve sample container without an ullage tube is not considered safe, and the single valve system is impossible to purge adequately). The United Kingdom also disapproved of the adoption of ISO 4257:1988 by CEN as EN ISO 4257 for the same reasons. However to fulfil BSI's obligation to publish all approved European Standards, it has been necessary for BSI to produce this British Standard.

Cross-reference

International Standard	Corresponding British Standard
ISO 7941:1988	BS 2000 <i>Methods of test for petroleum and its products</i> Part 405:1994 <i>Commercial propane and butane — Analysis by gas chromatography</i>

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN ISO title page, pages 2 to 8, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Liquefied petroleum gases — Method of sampling

(ISO 4257:1988)

Gaz de pétrole liquéfiés — Méthode
d'échantillonnage
(ISO 4257:1988)

Flüssiggas — Probenahme
(ISO 4257:1988)

This European Standard was approved by CEN on 1995-01-02. CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.
