Cooperating organizations

The Surface Coatings (other than Paints) Standards Committee, under whose direction this British Standard was prepared, consists of representatives from the following Government department and scientific and industrial organizations:

- Aluminium Federation*
- Assay Offices Committee of Great Britain
- Association of Metal Sprayers
- British Industrial Fasteners Federation*
- British Jewellery and Giftware Federation Ltd.
- British Metal Finishing Suppliers' Association
- BNF Metals Technology Centre*
- British Steel Industry
- Chemical Industries Association
- Copper Development Association
- Electricity Supply Industry in England and Wales
- Electronic Engineering Association*
- Engineering Equipment Users' Association
- Greater London Council
- Institute of Metal Finishing*
- Institute of Sheet Metal Engineers
- Institute of Vitreous Enamellers
- Metal Finishing Association*
- Ministry of Defence*
- Motor Cycle Association of Great Britain Ltd.
- Society of Motor Manufacturers and Traders Ltd.*
- Vitreous Enamel Development Council
- Zinc Development Association*

The organizations marked with an asterisk in the above list, together with the following, were directly represented on the committee entrusted with the preparation of this British Standard:

- Association of Manufacturers of Domestic Electrical Appliances
- British Anodising Association
- City of London Polytechnic
- Motor Industry Research Association
- Non-Destructive Testing Trade Association
- Telecommunication Engineering and Manufacturing Association
- Individual company

This British Standard, having been prepared under the direction of the Surface Coatings (other than Paints) Standards Committee, was published under the authority of the Executive Board on 31 January 1979

National foreword

This Part of BS 5466 is published under the direction of the Surface Coatings (other than Paints) Standards Committee. It is identical with ISO 4541:1978 “*Metallic coatings — Corrodokote corrosion test (CORR test)*” which has been prepared, with the active participation and approval of the United Kingdom, by Sub-committee 7, Corrosion tests, of Technical Committee 107, Metallic and other non-organic coatings, of the International Organization for Standardization (ISO). It is intended to publish further Parts as the international work progresses.

In 1994 the European Committee for Standardization (CEN) accepted ISO 4541:1978 as European Standard EN ISO 4541:1994. As a consequence of implementing the European Standard this British Standard is renumbered as BS EN 4541 and any reference to BS 5466-5 should be read as a reference to BS EN ISO 4541.

Terminology and conventions. The text of the International Standard has been approved as suitable for publication, without deviation, as a British Standard. Some terminology and certain conventions are not identical with those used in British Standards; attention is especially drawn to the following.

The comma has been used throughout as a decimal marker.

In British Standards it is current practice to use a full point on the baseline as the decimal marker.

Where the words “International Standard” appear, referring to this publication, they should be interpreted as “British Standard”.

Cross-references

International Standard	Corresponding British Standard
ISO 1462:1973	BS 3745:1970 <i>The evaluation of results of accelerated corrosion tests on metallic coatings</i> (Technically equivalent)
ISO 3768:1976	BS 5466 <i>Methods for corrosion testing of metallic coatings</i> Part 1:1977 <i>Neutral salt spray test</i> (NSS test) (Identical)

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN ISO title page, pages 2 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
