National foreword

This British Standard has been prepared under the direction of the Textiles and Clothing Standards Policy Committee and is the English language version of EN ISO 6940:1995 *Textile fabrics — Burning behaviour — Determination of ease of ignition of vertically oriented specimens*, published by the European Committee for Standardization (CEN). It is identical with ISO 6940:1984, including Amendment 1, published by the International Organization for Standardization (ISO).

BS EN ISO 6940 and BS EN ISO 6941, including their amendments, supersede equivalent tests in BS 5438:1989, which are deleted by amendment.

BS 5438:1976 is retained for the time being as it is required for use in legislation.

EN ISO 6940 was prepared as a result of international discussions in which the UK took an active part.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This European Standard was approved by CEN on 1995-01-02. CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.
