

Coating powders —

Part 9: Sampling

The European Standard EN ISO 8130-9:1999 has the status of a British Standard

ICS 87.040

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Pigments, Paints and Varnishes Standards Policy Committee (PVC/-) to Technical Committee PVC/10, upon which the following bodies were represented:

- European Resin Manufacturers' Association
- Health and Safety Executive
- Institute of Metal Finishing
- Ministry of Defence
- National Centre of Tribology
- Oil and Colour Chemists Association
- Paint Research Association
- Paintmakers Association of Great Britain Ltd.
- Titanium Pigment Manufacturers Technical Committee

This British Standard, having been prepared under the direction of the Pigments, Paints and Varnishes Standards Policy Committee, was published under the authority of the Standards Board and comes into effect on 15 April 1993

National foreword

This British Standard is the English language version of EN ISO 8130-9:1999. It is identical with ISO 8130-9:1992.

It supersedes BS 3900-J1:1987, which is withdrawn.

The main differences between this standard and BS 3900-J1:1987 are as follows.

- a) Reference to apparatus in other standards is not now made; figures showing all sample dividers are included.
- b) Minimum sample allowed is now 2 kg.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN ISO title page, the EN ISO foreword page, page 1 to 4, an inside back cover and a back cover.
