

Contact lenses and contact lens care products — Vocabulary —

Part 2: Contact lens care products

The European Standard EN ISO 8320-2:2001 has the status of a British Standard

ICS 01.040.11; 11.040.70

National foreword

This British Standard is the official English language version of EN ISO 8320-2:2001. It is identical with ISO 8320-2:2001. Together with BS EN ISO 8320-1, when published will supersede BS 3521-3:1988 which will then be withdrawn. The UK participation in its preparation was entrusted by Technical Committee CH/78, Ophthalmic optics, to Subcommittee CH/78/4, Contact lenses and contact lens care products, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Cross-references

Attention is drawn to the fact that CEN and CENELEC Standards normally include an annex which lists normative references to international publications together with their corresponding European publications. The British Standards which implement these international or European publications may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

This British Standard, having been prepared under the direction of the Health and Environment Sector Committee, was published under the authority of the Standards Committee and comes into effect on 15 August 2001

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this part of ISO 8320 may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

International Standard ISO 8320-2 was prepared by Technical Committee ISO/TC 172, *Optics and optical instruments*, Subcommittee SC 7, *Ophthalmic optics and instruments*.

This first edition of ISO 8320-2, together with ISO 8320-1, cancels and replaces ISO 8320:1986, which has been technically revised. The 1986 edition of ISO 8320 has been modified to include new terms for contact lenses and expanded in scope to provide, for the first time, the addition of terms for contact lens care products. As a result of this expansion, ISO 8320 consists of two parts.

ISO 8320 consists of the following parts, under the general title *Contact lenses and contact lens care products — Vocabulary*:

- *Part 1: Contact lenses*
- *Part 2: Contact lens care products*
