Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee STI/52, Adhesives, upon which the following bodies were represented:

- British Adhesives and Sealants Association
- British Plastics Federation
- British Steel Industry
- Centre for Adhesive Technology
- Chemical Industries' Association
- Contract Flooring Association
- Department of the Environment (Building Research Establishment)
- Department of Trade and Industry (National Physical Laboratory)
- European Resin Manufacturers' Association
- Federation of the Electronics Industry
- Institute of Materials
- Ministry of Defence
- Society of Motor Manufacturers and Traders
- Timber Research and Development Association
- University of Bristol
- Welding Institute

This British Standard, having been prepared under the direction of the Sector Board for Materials and Chemicals, was published under the authority of the Standards Board and comes into effect on 15 November 1995

National foreword

This British Standard has been prepared by Technical Committee STI/52 and is the English language version of EN ISO 9664 *Adhesives — Test methods for fatigue properties of structural adhesives in tensile shear*, published by the European Committee for Standardization (CEN). EN ISO 9664 was produced as a result of international discussion in which the United Kingdom participated.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN ISO title page, pages 2 to 13 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Adhesives — Test methods for fatigue properties of structural adhesives in tensile shear

(ISO 9664:1993)

Adhésifs — Méthodes d'essai de tenue à la fatigue d'adhésifs structuraux en traction-cisaillement
(ISO 9664:1993)

Klebstoffe — Verfahren zur Prüfung der Ermüdungseigenschaften von strukturklebungen bei Zugscherbeanspruchung
(ISO 9664:1993)

This European Standard was approved by CEN on 1995-05-11. CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

The text of the International Standard from ISO/TC 61, Plastics, of the International Organization for Standardization (ISO) has been taken over as a European Standard by the Technical Committee CEN/TC1 93, Adhesives.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by December 1995, and conflicting national standards shall be withdrawn at the latest by December 1995.

According to the CEN/CENELEC Internal Regulations, the following countries are bound to implement this European Standard: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.
