

OBSOLESCE
JULY 1983

Specification for

Heavy duty, electro-magnetically operated, single-pole circuit-breakers for extra-low voltage d.c. systems in aircraft

UDC 621.316.57:629.13.066

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Amendments issued since publication

Amd. No.	Date of issue	Comments
4301	July 1983	Indicated by a sideline in the margin

This British Standard, having been approved by the Aircraft Industry Standards Committee and endorsed by the Chairman of the Engineering Divisional Council, was published under authority of the General Council of the Institution on 19 January 1953

Contents

	Page
Section 1. General requirements	
1 Scope	1
2 General construction	1
3 Rating and overload characteristics	1
Section 2. Particular requirements	
4 Operation	1
5 Mechanical latching	1
6 Operating voltage	1
7 Economy or hold-on coils or resistances	1
8 Self re-closing	1
9 Terminals and electrical connections	1
10 Current carrying contacts	2
11 Arcing contacts	2
12 Auxiliary contacts	2
13 Vibration, acceleration, climatic proofing and flameproofing	2
14 Marking	2
Section 3. Tests	
15 General	2
A. Type tests	
16 Millivolt drop test	2
17 Vibration test	2
18 Acceleration test	2
19 Climatic test	2
20 Functioning tests	3
21 High voltage tests	3
22 Millivolt drop test	3
23 Operating tests	3
24 Temperature rise	3
25 Flameproof test	3
26 Self re-closing at low temperature	3
27 Calibration of overload trip	3
28 High temperature test	3
29 Overload trip tests	3
30 Making-and-breaking capacity tests	4
31 Endurance tests	4
B. Production tests	
32 Operating tests	4
33 Overload trip	5
34 High voltage tests	5
35 Selection of samples	5
36 Overload calibration tests	5
37 Interpretation of results	5
Figure 1 — Envelope of current-time characteristic curves	6
Table 1 — Current ratings	1
Table 2 — Voltage drop and load inductance	4
