Foreword

This British Standard has been prepared on the basis of the standard procedure for electrical diagrams for aircraft formulated by the Society of British Aerospace Companies.

The standard makes reference to the following:

BS 3238, *Graphical symbols for components of servo-mechanisms.*

BS 3939, *Graphical symbols for electrical power, telecommunications and electronics diagrams.*

NOTE Where metric equivalents are shown in parentheses after values in imperial units, the figures in imperial units are to be regarded as the standard. The metric equivalents are approximate; more accurate conversions should be based on the tables in BS 350, “*Conversion factors and tables*”.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 3 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

This British Standard, having been approved by the Aerospace Industry Standards Committee, was published under the authority of the Executive Board of the Institution on 30 January 1969
