Foreword

This British Standard has been prepared at the request of the Aerospace Industry. It specifies general requirements for lighting controllers which supply electric filament lamps used in aircraft instruments and for the illumination of panels. The standard assumes the use of solid state components; controllers using other types of components are not, however, excluded provided they comply with the requirements of this standard. It is intended that this standard be read in conjunction with the relevant equipment specification.

NOTE Information regarding metric (SI) units is given in BS 3763 “*The International System of units (SI)*”, BS 350 “*Conversion factors and tables*” and PD 5686 “*The use of SI units*”.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Amendments issued since publication

Amd. No.	Date	Comments

This British Standard, having been approved by the Aerospace Industry Standards Committee, was published under the authority of the Executive Board on 31 January 1975

Contents

	Page
Foreword	Inside front cover
Section 1. General	
1 Scope	1
2 References	1
3 Definitions	1
4 General construction	1
5 Nominal supply voltages	1
6 Preferred output ratings	1
7 Input supply characteristics	2
8 Output characteristics	2
9 Efficiency	2
10 Operation	2
11 Protection	2
12 Environmental conditions	2
Section 2. Particular requirements	
13 Arrangement and construction	2
14 Components	2
15 Electromagnetic interference	3
16 Magnetic influence	3
17 Temperature limitation	3
18 Bonding	3
19 Markings	3
Section 3. Tests	
20 General	3
21 Test conditions	3
22 Performance type tests	4
23 Environmental tests	4
24 Production acceptance tests	5
25 Production quality tests	5
Appendix A Dust and sand test	Inside back cover
Figure 1 — Measuring device for dust and sand test	Inside back cover
Table 1 — Preferred voltages	1
Table 2 — Preferred output ratings	1
