

BSI Standards Publication

**Nuclear power plants — Instrumentation
important to safety — Containment monitoring
for early detection of developing deviations
from normal operation in light water reactors**

National foreword

This British Standard is the UK implementation of IEC 60910:2022.

The UK participation in its preparation was entrusted to Technical Committee NCE/8, Instrumentation, Control & Electrical Systems of Nuclear Facilities.

A list of organizations represented on this committee can be obtained on request to its committee manager.

Contractual and legal considerations

This publication has been prepared in good faith, however no representation, warranty, assurance or undertaking (express or implied) is or will be made, and no responsibility or liability is or will be accepted by BSI in relation to the adequacy, accuracy, completeness or reasonableness of this publication. All and any such responsibility and liability is expressly disclaimed to the full extent permitted by the law.

This publication is provided as is, and is to be used at the recipient's own risk.

The recipient is advised to consider seeking professional guidance with respect to its use of this publication.

This publication is not intended to constitute a contract. Users are responsible for its correct application.

FOREWORD.....	4
INTRODUCTION.....	6
1 Scope.....	8
2 Normative references	8
3 Terms and definitions	9
4 Physical parameters	9
4.1 General.....	9
4.2 Temperature of containment atmosphere and fluid drains	9
4.2.1 General	9
4.2.2 Atmospheric temperature.....	9
4.2.3 Drain temperatures	10
4.3 Pressure in the containment.....	10
4.4 Humidity in the containment.....	10
4.5 Combustible gas concentration in the containment.....	10
4.6 Water level in the drain sumps	10
4.7 Fluid flow balance	10
4.8 Radioactivity in the containment atmosphere	10
4.9 Chemical analysis of water in the drain sumps	11
4.10 Visible abnormalities	11
4.11 Noise and vibration	11
4.12 Fire	11
4.13 Operability of instrumentation	11
4.14 Performance requirements.....	11
4.15 Documentation of performance criteria.....	11
5 Design criteria	12
5.1 Performance requirements	12
5.2 Physical independence	12
5.3 Electrical isolation.....	12
5.4 Information ambiguity.....	12
5.5 Power supply	12
5.6 Calibration	12
5.7 Testability	12
5.8 Direct measurement.....	12
5.9 Control of access	13
5.10 Measurement and repair	13
5.11 Supporting features	13
5.12 Alarm	13
6 Qualification criteria.....	13
6.1 General.....	13
6.2 Environmental	13
6.3 Seismic.....	13
6.4 Accident.....	13
7 Display criteria	14
7.1 Human factors	14
7.2 Display of distributed data.....	14
7.3 Trend or rate information	14

7.4	Continuous versus on-demand displays	14
7.5	Display identification	14
7.6	Display location	14
8	Quality assurance.....	14

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**NUCLEAR POWER PLANTS –
INSTRUMENTATION IMPORTANT TO SAFETY –
CONTAINMENT MONITORING FOR EARLY DETECTION OF DEVELOPING
DEVIATIONS FROM NORMAL OPERATION IN LIGHT WATER REACTORS**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 60910 has been prepared by subcommittee 45A: Instrumentation, control and electrical power systems of nuclear facilities, of IEC technical committee 45: Nuclear instrumentation. It is an International Standard.

This second edition cancels and replaces the first edition, published in 1988. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) Modification of title;
- b) Integration of new technology and knowledge;
- c) Drafting directed towards monitoring conditions in containment under normal conditions.
