National foreword

This British Standard reproduces verbatim IEC 61366-2:1998 and implements it as the UK national standard.

The UK participation in its preparation was entrusted to Technical Committee MCE/15, Hydraulic turbines, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

From 1 January 1997, all IEC publications have the number 60000 added to the old number. For instance, IEC 27-1 has been renumbered as IEC 60027-1. For a period of time during the change over from one numbering system to the other, publications may contain identifiers from both systems.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the IEC title page, pages ii to iv, pages 1 to 18 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Amendments issued since publication

Amd. No.	Date	Comments

This British Standard, having been prepared under the direction of the Engineering Sector Board, was published under the authority of the Standards Board and comes into effect on 15 June 1998

0 Introduction to technical specifications	2
1 Scope	3
2 Reference documents	3
3 Technical requirements	3
3.1 Scope of work	3
3.2 Limits of the contract	4
3.3 Supply by Employer	4
3.4 Design conditions	5
3.5 Technical performance and other guarantees	7
3.6 Mechanical design criteria	9
3.7 Design documentation	9
3.8 Materials and construction	10
3.9 Shop inspection and testing	11
4 Technical specifications for fixed/embedded components	12
4.1 Spiral case	12
4.2 Stay ring	12
4.3 Foundation ring	12
4.4 Draft tube and draft tube liner	13
4.5 Pit liner	13
5 Technical specifications for stationary/removable components	13
5.1 Headcover and bottom ring	13
5.2 Guide vanes	14
6 Technical specifications for guide vane regulating apparatus	14
6.1 Servomotors	14
6.2 Connecting rods	14
6.3 Regulating ring	14
6.4 Guide vane linkage	14
6.5 Guide vane overload protection	14
6.6 Locking devices	14
7 Technical specifications for rotating parts, bearings and seals	14
7.1 Runner	14
7.2 Main shaft	14
7.3 Turbine guide bearing	15
7.4 Main shaft seal	15
7.5 Standstill shaft (maintenance) seal	15
8 Technical specifications for thrust bearing (when specified as part of turbine supply)	15
8.1 Design data	15
8.2 Bearing support	15
8.3 Bearing assembly	15
8.4 Oil injection pressure lift system	15
9 Technical specifications for miscellaneous components	16
9.1 Walkways, access platforms and stairs	16
9.2 Lifting fixtures	16
9.3 Special tools	16
9.4 Standard tools	16
9.5 Turbine pit hoist	16
9.6 Nameplate	16
10 Technical specifications for auxiliary systems	16
10.1 Bearing lubrication system	16

	Page
10.2 Runner pressure balancing and pressure relief lines	16
10.3 Turbine pit drainage	16
10.4 Lubrication of guide vane regulating system	16
10.5 Air admission system	16
10.6 Tailwater depression system	16
11 Technical specifications for instrumentation	16
11.1 Controls	16
11.2 Indication	17
11.3 Protection	17
12 Spare parts	17
13 Model acceptance tests	17
14 Site installation and commissioning	17
14.1 General	17
14.2 Installation procedures	18
14.3 Tests during installation	18
14.4 Commissioning tests	18
15 Field acceptance tests	18
15.1 Scope and reports	18
15.2 Inspection of cavitating pitting	18

CONTENTS OF GUIDE IEC 61366-1 TO IEC 61366-7			SAMPLE TABLE OF CONTENTS OF TENDERING DOCUMENTS (TD) (Example for the Francis turbines; see 61366-1, Annex A)	
Part	Clause	Title	Chapter	Title
1		General and annexes	1	Tendering requirements
1	—		2	Project information
1	1	Object and scope of this guide	3	General conditions
1	2	Reference documents and definitions	4	Special conditions
1	3	Arrangement of Tendering Documents	5	General requirements
1	4	Guidelines for tendering requirements	6	Technical specifications
1	5	Guidelines for project information	6.1	Technical requirements
1	6	Guidelines for general conditions, special conditions and general requirements	6.1.1	Scope of work
1		Annexes	6.1.2	Limits of the contract
	A	Sample table of contents of Tendering Documents for Francis turbines	6.1.3	Supply by Employer
	B	Comments on factors for evaluation of tenders	6.1.4	Design conditions
	C	Check list for tender form	6.1.5	Performance and other guarantees
	D	Examples of technical data sheets	6.1.6	Mechanical design criteria
	E	Technical performance guarantees	6.1.7	Design documentation
	F	Example of cavitation pitting guarantees	6.1.8	Materials and construction
	G	Check list for model test specifications	6.1.9	Shop inspection and testing
	H	Sand erosion considerations	6.2	Technical specifications for fixed/embedded components
2 to 7		Technical specifications	6.3	Technical specifications for stationary/removable components
2		Francis turbines	6.4	Technical specifications for guide vane regulating apparatus
3		Pelton turbines	6.5	Technical specifications for rotating parts, bearings and seals
4		Kaplan and propeller turbines	6.6	Technical specifications for thrust bearings
5		Tubular turbines	6.7	Technical specifications for miscellaneous components
6		Pump-turbines	6.8	Technical specifications for auxiliary systems
7		Storage pumps	6.9	Technical specifications for instrumentation
			6.10	Spare parts
			6.11	Model tests
			6.12	Installation and commissioning
			6.13	Field acceptance tests
