National foreword

This British Standard reproduces verbatim ISO 10054:1998 and implements it as the UK national standard.

The UK participation in its preparation was entrusted to Technical Committee MCE/22, Engines for road vehicles, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO title page, pages ii to iv, pages 1 to 14 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Amendments issued since publication

Amd. No.	Date	Comments

This British Standard, having been prepared under the direction of the Engineering Sector Committee, was published under the authority of the Standards Committee and comes into effect on 15 November 1998

Foreword	iii
1 Scope	1
2 Normative references	1
3 Definition	1
4 Symbols	1
5 Measurement principle	2
6 Characteristics of filter-type smokeometers	2
6.1 Reference conditions	2
6.2 General specifications	2
6.3 Parameters	4
7 Information required from manufacturer	5
8 Operating conditions of filter-type smokeometer	6
8.1 Installation of filter-type smokeometer	6
8.2 Sampling procedure	6
9 Maintenance of filter-type smokeometer functional ability	6
10 Verification of types of filter-type smokeometers	7
10.1 Applicable procedures	7
10.2 Instrumentation and checking facilities for verification	7
10.3 Checking for verification	7
10.4 Measurements and calculations for verification	8
10.5 Cleanliness of gas in dead volume	8
10.6 Temperature at end of sampling	8
10.7 Representative sampling	9
10.8 Uniform blackening of filter area	9
10.9 Reflectometer characteristics	9
10.10 Filter characteristics	10
10.11 Calibration screen	10
10.12 Accuracy of reflectometer system	10
10.13 Statistical methods	10
Annex A (normative) Equipment for checking leakage and actual suction volume of filter-type smokeometer	11
A.1 General description	11
A.2 Specification of equipment necessary	11
A.3 Preparatory steps	11
A.4 Test procedure for checking leak-tightness and actual suction volume	13
A.5 Test procedure for checking nominal suction volume	13
Annex B (informative) Bibliography	14
Figure A.1	12
Table A.1 — Procedure for preparation	13
Table A.2 — Procedure for checking leakage and actual suction volume	13

Descriptors: Road vehicles, internal combustion engines, diesel engines, exhaust gases, exhaust emissions, measurement, measuring instruments, specifications, operating requirements, tests, verification.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 10054 was prepared jointly by Technical Committees ISO/TC 22, *Road vehicles*, Subcommittee SC 5, *Engine tests* and ISO/TC 70, *Internal combustion engines*, Subcommittee SC 5, *Special requirements*.

Annex A forms an integral part of this International Standard. Annex B is for information only.
