Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee MCE/1, Steel roller chains, upon which the following bodies were represented:

- British Industrial Truck Association
- Institution of Mechanical Engineers
- Precision Chain Manufacturers' Association

This British Standard, having been prepared under the direction of the Engineering Sector Board, was published under the authority of the Standards Board and comes into effect on 15 June 1996

Text of ISO 10823	1

National foreword

This British Standard reproduces verbatim ISO 10823:1996 and implements it as the UK national standard.

This British Standard is published under the direction of the Engineering Sector Board whose Technical Committee MCE/1 has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international committee any enquiries on interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

NOTE International and European Standards, as well as overseas standards, are available from Customer Services, BSI, 389 Chiswick High Road, London W4 4AL.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO title page, pages ii to iv, pages 1 to 11 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Guidance on the selection of roller chain drives

Méthode de sélection des transmissions par chaîne à rouleaux

Contents

	Page
Foreword	iii
1 Scope	1
2 Normative reference	1
3 Symbols	1
4 Basic equations	2
5 Drive design specifications	2
6 Sprocket selection	2
7 Chain calculations and selection	2
8 Maximum sprocket centre distance	6
9 Lubrication	7
10 Good practice in drive design	9
Annex A (informative) Example of chain drive selection	10
Figure 1 — Typical capacity chart for selection of type A chains conforming to ISO 606	3
Figure 2 — Typical capacity chart for selection of type B chains conforming to ISO 606	4
Figure 3 — Factor f_2 allowing for the number of teeth on the drive sprocket	5
Figure 4 — Selection chart for lubrication ranges	8
Figure 5 — Chain drive inclination	9
Figure A.1 — Diagrammatic layout of chain drive	11
Table 1 — Symbols and units	1
Table 2 — Application factor f_1	4
Table 3 — Definitions of characteristics of driver machines	4
Table 4 — Definitions of characteristics of driven machines	5
Table 5 — Calculated values of factor f_3	6
Table 6 — Calculated values of factor f_4	7
Table 7 — Viscosity classes of chain drive lubricating oils	9
