

Prefilled syringes —

Part 4: Glass barrels for injectables

ICS 11.040.25

National foreword

This British Standard was published by BSI. It is the UK implementation of ISO 11040-4:2007.

The UK participation in its preparation was entrusted to Technical Committee CH/212, IVDs.

A list of organizations represented on CH/212 can be obtained on request to its secretary.

Other parts of ISO 11040 have been published previously as dual-numbered standards in the BS 7652 series for prefilled syringes.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 30 March 2007

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 11040-4 was prepared by Technical Committee ISO/TC 76, *Transfusion, infusion and injection equipment for medical and pharmaceutical use*.

This second edition cancels and replaces the first edition (ISO 11040-4:1996) which has been technically revised.

ISO 11040 consists of the following parts, under the general title *Prefilled syringes*:

- *Part 1: Glass cylinders for dental local anaesthetic cartridges*
- *Part 2: Plungers and discs for dental local anaesthetic cartridges*
- *Part 3: Aluminium caps for dental local anaesthetic cartridges*
- *Part 4: Glass barrels for injectables*
- *Part 5: Plungers for injectables*
