National foreword

This British Standard reproduces verbatim ISO 12218:1997 and implements it as the UK national standard.

The UK participation in its preparation was entrusted to Technical Committee PAI/43, Graphic technology, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO title page, pages ii to iv, pages 1 to 15 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

This British Standard, having been prepared under the direction of the Sector Board for Materials and Chemicals, was published under the authority of the Standards Board and comes into effect on 15 November 1997

Foreword	iii
Introduction	1
1 Scope	3
2 Normative references	3
3 Definitions	3
4 Requirements	7
4.1 Colour separation film quality	7
4.2 Control patches	7
4.3 Selection of the exposure	8
4.3.1 Positive-acting plates	8
4.3.2 Negative-acting plates	8
4.4 Reproduction limits	8
5 Test methods	9
5.1 Tone value on an offset printing forme — Reference method	9
5.2 Tone value of a half-tone control patch on a control strip	9
Annex A (normative) Determination of quality parameters of half-tone dots on a half-tone film	10
Annex B (informative) Secondary test method for positive-acting plates: Tone values on an offset printing forme — Microlines	10
Annex C (informative) Secondary test method: Tone values on an offset printing forme — Densitometry	12
Annex D (informative) Test method: Platemaking gradation	13
Annex E (informative) Factors which may affect tone value transfer from a half-tone film to a printing forme	14
Annex F (informative) Bibliography	15
Figure B.1 — Positive-acting plates: Example for the dependence of positive and negative microline readings on exposure	11
Figure B.2 — Positive-acting plates: Example for the determination of the exposure latitude	12
Figure D.1 — Example of a diagram showing the determination of the platemaking gradation, positive-acting plate	13
Table 1 — Tone value decrease from the half-tone film to the printing forme	8
Table 2 — Tone value increase from the half-tone film to the printing forme	8
Table B.1 — Positive microline reading ranges	11

Descriptors: Graphic technology, printing, colour printing, offset printing, preparation, offset plates, process control, specifications, tests, printing tests.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 12218 was prepared by Technical Committee ISO/TC 130, *Graphic technology*.

Annex A forms an integral part of International Standard. Annex B to Annex F are for information only.
