National foreword

This British Standard reproduces verbatim ISO 12775:1997 and implements it as the UK national standard.

The UK participation in its preparation was entrusted to Technical Committee LBI/36, Laboratory glassware and related apparatus, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO title page, pages ii to iv, pages 1 to 8 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

This British Standard, having been prepared under the direction of the Sector Board for Materials and Chemicals, was published under the authority of the Standards Board and comes into effect on 15 January 1998

Contents

	Page
Foreword	iii
1 Scope	1
2 Normative references	1
3 Main types of glass of normal bulk-production composition	1
4 Chemical properties of glass and glass articles	2
4.1 General	2
4.2 Glass as a material and glass as-delivered	2
4.3 Test methods	2
4.3.1 Hydrolytic resistance (see ISO 719, ISO 720, ISO 4802-1 and ISO 4802-2)	2
4.3.2 Acid resistance (see ISO 1776)	4
4.3.3 Alkali resistance (see ISO 695)	4
4.3.4 Other chemical test methods	4
4.4 Classifications of glass and glass articles according to their chemical properties	4
4.4.1 Principle of classifications	4
4.4.2 Classification table and/or limit values	4
5 Physical properties	6
5.1 Thermal properties	6
5.2 Other physical properties	7
Annex A (informative) Bibliography	8
Table 1 — Classification of main types of glass of normal bulk-production composition according to their chemical composition	3
Table 2 — Hydrolytic resistance of glass grains at 98 °C in accordance with ISO 719	4
Table 3 — Hydrolytic resistance of glass grains at 121 °C in accordance with ISO 720	5
Table 4 — Hydrolytic resistance of the interior surfaces of glass containers determined by the titration method given in ISO 4802-1	5
Table 5 — Hydrolytic resistance of the interior surfaces of glass containers determined by flame spectrometric methods given in ISO 4802-2	6
Table 6 — Resistance to attack by a boiling aqueous solution of mixed alkali determined in accordance with ISO 695	6

Descriptors: Glass, classification, tests, determination, physical properties, chemical properties, general conditions, surveys.
