National foreword

This British Standard is the UK implementation of ISO 12986-2:2014. It supersedes BS ISO 12986-2:2005 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee CII/24, Raw materials for the aluminium industry.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 31 July 2014.

Amendments issued since publication

Date	Text affected
------	---------------

Carbonaceous materials used in the production of aluminium — Prebaked anodes and cathode blocks —

Part 2: Determination of flexural strength by the four-point method

*Produits carbonés utilisés pour la production de l'aluminium —
Anodes précuites et blocs cathodiques —*

*Partie 2: Détermination de la résistance à la flexion par la méthode
quatre points*
