National foreword

This British Standard reproduces verbatim ISO 14258:1998 and implements it as the UK national standard.

The UK participation in its preparation was entrusted to Technical Committee AMT/5, AMT reference model, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO title page, pages ii to iv, pages 1 to 12 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Amendments issued since publication

Amd. No.	Date	Comments

This British Standard, having been prepared under the direction of the DISC Board, was published under the authority of the Standards Board and comes into effect on 15 December 1998

Industrial automation systems — Concepts and rules for enterprise models

*Systèmes d'automatisation industrielle — Concepts et règles pour modèles
d'entreprise*

Contents

	Page
Foreword	iv
Introduction	1
1 Scope	1
2 Definitions	1
2.1 Definitions of enterprise concepts	1
2.2 Definitions of model concepts	1
3 Concepts and rules	2
3.1 Purpose of enterprise models (informative)	2
3.2 System theory as a basis for enterprise models	2
3.2.1 Methodologies derived from system theory (informative)	2
3.2.2 Factors of production	2
3.2.3 Scope of enterprise models	2
3.2.4 Availability and format of model information	3
3.2.5 Semantics and syntax of an enterprise model	3
3.2.6 Management of constituent parts	3
3.3 Concepts for life-cycle phases (informative)	3
3.3.1 Issue-solving activities	3
3.3.2 Life cycle of systems	3
3.3.3 Recursion	4
3.3.4 Iteration	4
3.3.5 Naming	4
3.4 Hierarchy	4
3.4.1 Concepts of hierarchy (informative)	4
3.4.2 Usages of hierarchy	4
3.5 Structure	4
3.5.1 Concepts of structure (informative)	4
3.5.2 Compatibility of structuring approaches	7
3.6 Behavior	7
3.6.1 Concepts of behavior (informative)	7
3.6.1.1 Time representation	7
3.6.1.2 Static representation	7
3.6.1.3 Dynamic representation	7
3.6.1.4 Short-term and long-term behavioral change	7
3.6.1.5 Sequentiality	7
3.6.2 Representation of behavior	7
3.7 Relating the real world to enterprise models through views	7
3.7.1 Purposes of models (informative)	7
3.7.2 Real world (informative)	8
3.7.3 Observers (informative)	8
3.7.4 Views	8
3.7.4.1 Information view	8
3.7.4.2 Function view	8
3.7.5 Rules for model views	8
3.8 Requirements for standards on model interoperability	9
3.8.1 Concepts of model integration (informative)	9
3.8.2 Forms of interoperability (informative)	9
3.8.3 Need for standards to support interoperability	10
4 Compliance and conformance	10

	Page
Annex A (informative) A context and vision for enterprise models	11
Bibliography	12
Figure 1 — Mapping between system life-cycle phases and system activities W, H, and D	3
Figure 2 — Decompose “Design Product” activity to show recursiveness of activities W, H, and D	5
Figure 3 — Iterating the “Design Product” activity to show feedback used for process improvement	6

Descriptors: Automation, automation engineering, computer applications, manufacturing, companies, models, rules (instructions).
