

# Implants for surgery — Metal intramedullary nailing systems —

## Part 3: Connection devices and reamer diameter measurements

ICS 11.040.40

# National foreword

This British Standard reproduces verbatim ISO 15142-3:2003 and implements it as the UK national standard. Together with the British Standards BS ISO 15142-1 and BS ISO 15142-2:2003 it supersedes BS 3531-14.1:1990 which is withdrawn.

The UK participation in its preparation was entrusted by Technical Committee CH/150, Implants for surgery, to Subcommittee CH/150/5, Osteosynthesis and spinal devices, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

## Cross-references

The British Standards which implement international publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

**Compliance with a British Standard does not of itself confer immunity from legal obligations.**

## Summary of pages

This document comprises a front cover, an inside front cover, the ISO title page, pages ii to v, a blank page, pages 1 to 5 and a back cover.
