National foreword

This British Standard reproduces verbatim ISO 15227:2000 and implements it as the UK national standard.

The UK participation in its preparation was entrusted to Technical Committee LBI/33, Microscopes, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the ISO title page, pages ii to iv, pages 1 to 9 and a back cover.

The BSI copyright notice displayed in this document indicates when the document was last issued.

This British Standard, having been prepared under the direction of the Sector Committee for Materials and Chemicals, was published under the authority of the Standards Committee and comes into effect on 15 June 2000

Foreword.....	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Accuracy of testing.....	1
5 Test conditions	1
5.1 Total visual magnification ($M_{TOT\ VIS}$)	1
5.2 Difference in total visual magnification between left and right optical systems	2
5.3 Difference in axes between left and right optical systems.....	2
5.4 Difference in the centres of the image fields between left and right optical systems.....	2
5.5 Difference in imaging rotations between right and left images	2
5.6 Axial shift of object plane by magnification change	2
5.7 Lateral shift of image plane by magnification change	2
5.8 Focus difference between left and right optical systems.....	2
5.9 Resolution for the highest magnification at the centre of the field	2
5.10 Difference in exit pupil heights between left and right optical systems	2
5.11 Minimum range for interpupillary distance	2
5.12 Calibration error if a dioptr scale is used	2
5.13 Minimum eyepiece dioptr adjustment range.....	2
6 Test methods.....	3
6.1 Apparatus	3
6.2 Apparatus configuration	4
6.3 Test procedures	4
