

Plastics — Compression-moulded sheets of polyethylene (PE-UHMW, PE-HD) — Requirements and test methods

ICS 83.140.10

National foreword

This British Standard is the UK implementation of ISO 15527:2007.

The UK participation in its preparation was entrusted to Technical Committee PRI/75, Plastics and rubber film and sheets.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 31 December 2007

Foreword.....	iv
1 Scope	1
2 Normative references	1
3 Material	1
4 Requirements	2
4.1 Appearance	2
4.2 Dimensional tolerances	2
4.3 Properties	3
5 Test methods.....	4
5.1 Test specimens	4
5.2 Delivery condition.....	5
5.3 Appearance	5
5.4 Dimensions.....	5
5.5 Density	5
5.6 Determination of abrasion properties	5
5.7 Tensile stress at yield, σ_y , and tensile strain at yield, ε_y	6
5.8 Modulus of elasticity in tension, E_t	6
5.9 Impact strength of notched specimens.....	6
5.10 Melt mass-flow rate (MFR)	6
6 Designation	6
7 Marking	7
Annex A (normative) Requirements for rectangularity	8
Annex B (normative) Determination of abrasion properties.....	9
Annex C (informative) Example of apparatus for the determination of abrasion properties	11

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 15527 was prepared by Technical Committee ISO/TC 61, *Plastics*, Subcommittee SC 11, *Products*, in collaboration with Technical Committee CEN/TC 249, *Plastics*, of the European Committee for Standardization (CEN).
