National foreword

This British Standard reproduces verbatim ISO 15570:1998 and implements it as the UK national standard.

The UK participation in its preparation was entrusted to Technical Committee NCE/2, Health physics instrumentation, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO title page, pages ii to iv, pages 1 to 11 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

This British Standard, having been prepared under the direction of the Engineering Sector Committee, was published under the authority of the Standards Committee and comes into effect on 15 August 1999

Practice for use of cellulose acetate dosimetry system

*Pratique d'utilisation d'un système dosimétrique de mesure à l'acétate de
cellulose*

Contents

	Page
Foreword	iii
1 Scope	1
2 Referenced Documents	1
3 Terminology	2
4 Significance and Use	3
5 Apparatus	3
6 Performance Check of Instrumentation	3
7 Preparation of Dosimeters	4
8 Calibration of Dosimeters	5
9 Condition for Practical Use	7
10 Report	8
11 Precision and Bias	8
12 Keywords	8
Appendix X1 (nonmandatory information) Information on cellulose acetate (CTA and CDA) dosimeters	9
Figure 1 — Absorption Spectra Before and After Irradiation of Untinted Cellulose Triacetate (CTA) Film with a 2 MeV Electron Beam	4
Figure 2 — The Relation Between the Increment of Absorbance ΔA /Nominal Thickness (0.125 mm) at 280 nm and Dose in Untinted CTA by Electron and Gamma-Radiation	4
Figure 3 — Absorption Spectra Before and After Irradiation to High Doses (Using ^{60}Co γ Rays, 0.4- and 10-MeV Electron Beams) of Yellow Cellulose Diacetate (CDA) Film	5
Figure 4 — Increase in the Reciprocal of Absorbance ($1/A$), at 390 nm Wavelength, as a Function of Absorbed Dose (in Water), when Yellow CDA is Irradiated with Electrons and Gamma Rays (16)	6
Table X1.1 — Basic Properties of Available Dosimeters	9
Table X1.2 — An Example of Single Purpose Absorbance Measuring Devices for Cellulose Acetate Dosimeters	9
