

BSI Standards Publication

Space systems — Stable operation requirements for spacecraft attitude and orbit control system

National foreword

This British Standard is the UK implementation of ISO 16615:2025.

The UK participation in its preparation was entrusted to Technical Committee ACE/68, Space systems and operations.

A list of organizations represented on this committee can be obtained on request to its committee manager.

Contractual and legal considerations

This publication has been prepared in good faith, however no representation, warranty, assurance or undertaking (express or implied) is or will be made, and no responsibility or liability is or will be accepted by BSI in relation to the adequacy, accuracy, completeness or reasonableness of this publication. All and any such responsibility and liability is expressly disclaimed to the full extent permitted by the law.

This publication is provided as is, and is to be used at the recipient's own risk.

The recipient is advised to consider seeking professional guidance with respect to its use of this publication.

This publication is not intended to constitute a contract. Users are responsible for its correct application.

Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Stable operation general principles	2
4.1 General	2
4.2 Classification of stable operation levels	2
4.2.1 General	2
4.2.2 Continuous operational service	2
4.2.3 Degraded performance operation	3
4.2.4 Emergency transitional operation	3
4.3 Factors affecting stable operation	3
4.3.1 General	3
4.3.2 Anomalies from known sources	3
4.3.3 Anomalies from unknown sources	3
4.4 Capability building for stable operation	3
4.5 Ground-based optimization and operational maintenance	4
5 Data validity assessment requirements	4
5.1 Basic principles of data validity judgement	4
5.2 Data validity assessment process	5
5.2.1 General	5
5.2.2 Status flag assessment	5
5.2.3 Data validity range assessment	5
5.2.4 Data continuity assessment	5
5.2.5 Data dynamism assessment	5
5.2.6 Data consistency assessment	6
6 Anomaly detection requirements	6
6.1 Classification of anomaly levels	6
6.1.1 General	6
6.1.2 Component-level anomaly detection	6
6.1.3 System-level anomaly detection	6
6.2 Component-level anomaly detection	6
6.3 System-level anomaly detection	7
7 Software or hardware fault handling requirements	7
7.1 Fault classification	7
7.1.1 General	7
7.1.2 Software faults	7
7.1.3 Hardware faults	7
7.2 Software fault handling requirements	7
7.3 Hardware fault handling requirements	7
8 Safety boundary check requirements	8
8.1 Principles of safety boundary checks	8
8.2 Requirements for safety boundary checks of spacecraft structure or mechanism	8
8.3 Requirements for safety boundary checks of spacecraft energy	8
8.4 Requirements for safety boundary checks of spacecraft propellant	8
9 Requirements for emergency survival modes in the spacecraft's AOCS	9
9.1 Classification of emergency survival modes	9
9.1.1 General	9
9.1.2 Sun-oriented safety mode	9
9.1.3 Stop-control safety mode	9

ISO 16615:2025(en)

9.2	Requirements for sun-oriented safety mode handling	9
9.3	Requirements for stop-control safety mode handling.....	9
10	Cybersecurity requirements for AOCS	10
10.1	General.....	10
10.2	Encryption of telemetry data.....	10
10.3	Access control for ground systems.....	10
10.4	Anomaly detection for cybersecurity breaches.....	10
10.5	Fault handling in the event of a cyber-attack.....	10
10.6	Regular security updates and testing.....	10
