

Imaging materials — Adhesive mounting systems — Specifications

ICS 37.040.99

National foreword

This British Standard reproduces verbatim ISO 18932:2005 and implements it as the UK national standard.

The UK participation in its preparation was entrusted to Technical Committee CPW/42, Photography, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the ISO title page, pages ii to v, a blank page, pages 1 to 10, an inside back cover and a back cover.

The BSI copyright notice displayed in this document indicates when the document was last issued.

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Requirements	1
3.1 Characteristics of adhesive mounting systems	1
3.2 Types of construction	2
3.3 Types of thermally-activated materials	3
3.4 Classes of thermally-activated materials	4
3.5 Other adhesives	4
3.6 Adhesive strength	4
3.7 Blocking	5
3.8 Shelf life and storage conditions	5
4 Adhesion tests	5
4.1 General	5
4.2 Unaged adhesive test	5
4.3 Heat-aged adhesive test	7
4.4 Initial adhesive stress test	7
4.5 Adhesive shelf life test	8
4.6 Combined shelf life/heat-aged adhesive test	8
5 Bleed test (penetration of adhesive through paper)	8
6 Photographic activity test	8
Annex A (informative) Numbering system for related International Standards	9

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 18932 was prepared by Technical Committee ISO/TC 42, *Photography*.

This first edition cancels and replaces two separate ANSI standards, which were combined to form this original ISO document.
