National foreword

This British Standard reproduces verbatim ISO 1998-4:1998 and implements it as the UK national standard.

The UK participation in its preparation was entrusted to Technical Committee PTI/13, Petroleum testing and terminology, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO title page, pages ii to iv, pages 1 to 13 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

This British Standard, having been prepared under the direction of the Sector Committee for Materials and Chemicals, was published under the authority of the Standards Committee and comes into effect on 15 January 1999

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 1998-4 was prepared by Technical Committee ISO/TC 28, *Petroleum products and lubricants*, Subcommittee SC 1, *Terminology*. This first edition, together with the other seven parts of ISO 1998, cancels and replaces all of the first edition, which was composed of two parts (ISO 1998-1:1974 and ISO 1998-2:1976).

This new edition constitutes a full recast of the standard, with a new classification system for all terms of the two parts of the first edition, which are now distributed in all parts of the new edition, and the addition of many new terms.

ISO 1998 consists of the following parts, under the general title *Petroleum industry — Terminology*:

- *Part 1: Raw materials and products;*
- *Part 2: Properties and tests;*
- *Part 3: Exploration and production;*
- *Part 4: Refining;*
- *Part 5: Transport, storage, distribution;*
- *Part 6: Measurement;*
- *Part 7: Miscellaneous terms;*
- *Part 99: General and index.*

Descriptors: Petroleum industry, crude oil, petroleum refining, vocabulary./ **Descripteurs:** Industrie du pétrole, pétrole brut, raffinage du pétrole, vocabulaire.

Avant-propos

L'ISO (Organisation internationale de normalisation) est une fédération mondiale d'organismes nationaux de normalisation (comités membres de l'ISO). L'élaboration des Normes internationales est en général confiée aux comités techniques de l'ISO. Chaque comité membre intéressé par une étude a le droit de faire partie du comité technique créé à cet effet. Les organisations internationales, gouvernementales et non gouvernementales, en liaison avec l'ISO participent également aux travaux. L'ISO collabore étroitement avec la Commission électrotechnique internationale (CEI) en ce qui concerne la normalisation électrotechnique.

Les projets de Normes internationales adoptés par les comités techniques sont soumis aux comités membres pour vote. Leur publication comme Normes internationales requiert l'approbation de 75 % au moins des comités membres votants.

La Norme internationale ISO 1998-4 a été élaborée par le comité technique ISO/TC 28, *Produits pétroliers et lubrifiants*, sous-comité SC 1, *Terminologie*.

Cette première édition, conjointement avec les sept autres parties de l'ISO 1998, annule et remplace la totalité de la première édition qui comprenait deux parties (ISO 1998-1:1974 et ISO 1998-2:1976).

Cette nouvelle édition constitue une refonte complète de la norme, avec un nouveau système de classification des termes des deux parties de la première édition, qui se trouvent maintenant répartis sur l'ensemble des parties de la nouvelle édition, et l'ajout de nombreux nouveaux termes.

L'ISO 1998 comprend les parties suivantes, présentées sous le titre général *Industrie pétrolière — Terminologie*:

- *Partie 1: Matières premières et produits;*
- *Partie 2: Propriétés et essais;*
- *Partie 3: Exploration et production;*
- *Partie 4: Raffinage;*
- *Partie 5: Transport, stockage, distribution;*
- *Partie 6: Mesurage;*
- *Partie 7: Termes divers;*
- *Partie 99: Généralités et index.*
