Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Information Systems Technology Standards Policy Committee (IST/-) to Technical Committee IST/6, upon which the following bodies were represented:

- Association for Payment Clearing Services
- British Computer Society
- British Telecommunications plc
- Business Equipment and Information Technology Association
- Department of Trade and Industry (Information Technology Standards Unit)
- Department of Trade and Industry (National Physical Laboratory)
- Electricity Supply Industry in England and Wales
- Electronic Engineering Association
- HM Treasury (Central Computer and Telecommunications Agency)
- Information Technology Users' Standards Association
- Insitute of Data Processing Management
- Inter-Universities Computing Committee
- Joint Network Team
- National Computing Centre Ltd.
- National Health Service
- OFTEL (Office of Telecommunications)
- Post Office
- Telecommunication Engineering and Manufacturing Association
- Telecommunications Managers' Association

This British Standard, having been prepared under the direction of the Information Systems Technology Standards Policy Committee, was published under the authority of the Board of BSI and comes into effect on 31 January 1991

Text of ISO 2110	1

National foreword

This British Standard reproduces verbatim ISO 2110:1989, including Amendment 1, and implements it as the UK national standard.

This British Standard is published under the direction of the Information Systems Technology Standards Policy Committee whose Technical Committee IST/6 has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international committee any enquiries on interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

NOTE International and European Standards, as well as overseas standards, are available from BSI Sales Department, BSI, Linford Wood, Milton Keynes, MK14 6LE.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO title page, pages ii to iv, pages 1 to 14 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

INTERNATIONAL STANDARD

Third edition
1989-10-01

AMENDMENT 1
1991-09-15

Information technology — Data communication — 25-pole DTE/DCE interface connector and contact number assignments

AMENDMENT 1: Interface connector and contact
assignments for a DTE/DCE interface for data
signalling rates above 20 000 bit/s

*Technologies de l'information — Communication de données — Connecteur
d'interface ETTD/ETCD à 25 pôles et affectation des numéros de contacts*

*AMENDEMENT 1: Connecteur d'interface et affectation des numéros de contacts à
l'interface ETTD/ETCD pour un débit binaire supérieur à 20 kbit/s*

Reference number

Descriptors: Data processing, data transmission, network interconnection, data communication equipment, connecting equipment, electric connectors, multi-contact connectors, connector pins, specifications, dimensions, layout, numbering.

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Amendment 1 to International Standard ISO 2110:1989 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*.

Annex B of this Amendment is for information only.
