Jewellery and precious metals — Fineness of solders used with precious metal jewellery alloys

National foreword

This British Standard is the UK implementation of [ISO 22764:2020](#).

The UK participation in its preparation was entrusted to Technical Committee STI/53, Specifications and test methods for jewellery and horology.

The use of solder in jewellery articles can be subject to individual national legislation and this legislation must be observed when using solder in jewellery articles intended for sale in such countries. Several requirements stated in this standard conflict with those of the UK Hallmarking Act 1973 and the latter thus takes precedence with precious metal articles offered for sale in the UK. The use of solder in jewellery articles can be subject to individual national legislation and this legislation must be observed when using solder in jewellery articles intended for sale in such countries. Several requirements stated in this standard conflict with those of the UK Hallmarking Act 1973 and the latter thus takes precedence with precious metal articles offered for sale in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
