Fireworks — Test methods for determination of specific chemical substances

Part 10: Nitrogen content in nitrocellulose by iron(II) sulfate titration

National foreword

This British Standard is the UK implementation of [ISO 22863-10:2021](#).

The UK participation in its preparation was entrusted to Technical Committee CII/47, Pyrotechnic articles.

A list of organizations represented on this committee can be obtained on request to its committee manager.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Foreword	iv
1 Scope	1
2 Normative reference	1
3 Terms and definitions	1
4 Principle	1
5 Reagents and materials	1
5.2 Potassium Nitrate (Pure)	2
5.4 Distilled Water	2
6 Apparatus	2
6.1 Any (manual or automatic) pH meter capable of measuring pH with a precision better than 0,1	2
6.2 Platinum Electrode for pH measurement	2
6.3 Glass, graphite or tungsten Electrode for pH measurement (reference electrode)	2
6.4 Magnetic Stirrer base with stirring bar	2
6.5 Blender	2
6.6 Cooling bath (e.g. ice bath) and/or other mechanical cooling system	2
6.7 Opaque vessel	2
6.8 Agate mortar	2
6.9 150 ml and 200 ml beakers	2
6.10 Petri dishes	2
6.11 250 ml Erlenmeyer	2
6.12 Antistatic plastic bags	2
6.14 Desiccator with drying agent (with colour indicator)	2
6.15 Laboratory reflux apparatus	2
6.16 100 °C drying oven	2
6.17 40 °C drying oven	2
6.18 50 °C drying oven	2
6.19 Timer (seconds)	2
6.20 Tissue paper or filtration paper	3
7 Preparation of the sample	3
7.1 Preliminary precaution	3
7.2 Step One	3
7.3 Step Two	3
7.4 Step Three	4
8 Preparation and calibration of the iron(II) sulphate solution	4
8.1 Preparation	4
8.2 Calibration	4
9 Titration of the last solid residue	6
10 Test report	7
Bibliography	8

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 264, *Fireworks*.

A list of all the parts in the ISO 22863- series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
