

BSI Standards Publication

Solar energy — Collector components and materials

Part 4: Glazing material durability and performance

National foreword

This British Standard is the UK implementation of [ISO 22975-4:2023](#).

The UK participation in its preparation was entrusted to Technical Committee RHE/25, Solar Heating.

A list of organizations represented on this committee can be obtained on request to its committee manager.

Contractual and legal considerations

This publication has been prepared in good faith, however no representation, warranty, assurance or undertaking (express or implied) is or will be made, and no responsibility or liability is or will be accepted by BSI in relation to the adequacy, accuracy, completeness or reasonableness of this publication. All and any such responsibility and liability is expressly disclaimed to the full extent permitted by the law.

This publication is provided as is, and is to be used at the recipient's own risk.

The recipient is advised to consider seeking professional guidance with respect to its use of this publication.

This publication is not intended to constitute a contract. Users are responsible for its correct application.

Contents		Page
Foreword		iv
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Classification of solar glass	2
4.1	General.....	2
4.2	Solar transmittance of untreated glass.....	2
4.3	Solar transmittance of single-side AR treated glass.....	2
4.4	Solar transmittance of double-side AR treated glass.....	2
5	Test methods for assessing material optical property of the glass	3
5.1	Preparation of test specimens.....	3
5.2	Measurements of solar transmittance.....	3
6	Tests for assessing the thermal stability of the glass	3
6.1	Apparatus.....	3
6.1.1	Hot oven.....	3
6.1.2	Cold bath.....	3
6.1.3	Basket.....	3
6.2	Specimens.....	3
6.2.1	Flat plate glass.....	3
6.2.2	Tube glass.....	4
6.3	Procedure.....	4
6.3.1	Ambient temperature.....	4
6.3.2	The hot oven.....	4
6.3.3	The cold bath.....	4
6.3.4	Heating the specimens.....	4
6.3.5	Cooling the specimens.....	4
6.3.6	Results.....	4
7	Thermal shock resistance	4
7.1	Test specimens.....	4
7.2	Temperature difference.....	4
7.3	Pass the test.....	4
7.4	Progressive test.....	5
7.5	High-level test.....	5
8	Thermal shock endurance	5
9	Report	5
Annex A (normative) Assessment of solar transmittance of solar glass		6
Annex B (Informative) General characteristics of glass materials		7
Bibliography		9
