

BSI Standards Publication

Thermal insulation for building equipment and industrial installations — Cellular glass products — Specification

National foreword

This British Standard is the UK implementation of ISO 24285:2022.

The UK participation in its preparation was entrusted to Technical Committee B/540/8, Mirror committee for ISO/TC 163 - Thermal Performance and Energy use in the built Environment.

A list of organizations represented on this committee can be obtained on request to its committee manager.

Contractual and legal considerations

This publication has been prepared in good faith, however no representation, warranty, assurance or undertaking (express or implied) is or will be made, and no responsibility or liability is or will be accepted by BSI in relation to the adequacy, accuracy, completeness or reasonableness of this publication. All and any such responsibility and liability is expressly disclaimed to the full extent permitted by the law.

This publication is provided as is, and is to be used at the recipient's own risk.

The recipient is advised to consider seeking professional guidance with respect to its use of this publication.

This publication is not intended to constitute a contract. Users are responsible for its correct application.

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Symbols and abbreviated terms	2
5 Characteristics	3
5.1 General.....	3
5.2 Thermal conductivity.....	3
5.3 Compression strength.....	4
5.4 Dimensions	5
5.5 Bending strength.....	6
5.6 Point load.....	6
5.7 Compressive creep.....	7
5.8 Long-term water absorption.....	7
5.9 Water vapour diffusion resistance.....	7
5.10 Fire behaviour.....	7
5.11 Maximum service temperature.....	7
5.12 Minimum service temperature.....	7
5.13 Trace quantities of water-soluble ions and the pH-value	7
6 Test methods	8
6.1 Sampling.....	8
6.2 Conditioning.....	8
6.3 Testing.....	8
6.3.1 Test methods and specimen requirements.....	8
6.3.2 Thermal conductivity	9
7 Designation code	9
8 Marking and labelling	10
Annex A (normative) Factory production control (FPC)	11
Annex B (informative) Product classification for flat products in respect of compressive strength and thermal conductivity	12
Bibliography	13

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 163, *Thermal performance and energy use in the built environment*, Subcommittee SC 3, *Thermal insulation products, components and systems*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
