

Gas cylinders — Cylinders for compressed and liquefied gases (excluding acetylene) — Inspection at time of filling

ICS 23.020.30

National foreword

This British Standard was published by BSI. It is the UK implementation of ISO 24431:2006.

The UK participation in its preparation was entrusted by Technical Committee PVE/3, Gas containers, to Subcommittee PVE/3/7, Gas cylinder (receptacle) operations.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 31 May 2007

Foreword.....	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Filling inspection	3
5 Description of inspection items	3
5.1 Verification of serviceable condition	3
5.2 Identification of cylinder owner.....	4
5.3 Verification of tare and calculation of weight of gas to be charged.....	4
5.4 Verification of internal cylinder condition.....	5
5.5 Verification of the integrity of permanent attachments	5
5.6 Verification of valve integrity and suitability	5
5.7 Check for correct filling pressure	6
5.8 Check for correct filling weight	6
5.9 Check of the valve protection.....	6
Annex A (informative) Example of a procedure to establish a correct tare	7
Annex B (informative) Procedures to be adopted when de-valving and/or when it is suspected that a cylinder valve is obstructed	8
B.1 Check for obstructed valve.....	8
B.2 Valve unobstructed.....	8
B.3 Valve obstructed.....	8

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 24431 was prepared by Technical Committee ISO/TC 58, *Gas cylinders*, Subcommittee SC 4, *Operational requirements for gas cylinders*.

This first edition of ISO 24431 cancels and replaces ISO 10463:1993 and ISO 11113:1995, of which it constitutes a technical revision.
