

Digital cinema (D-cinema) operations

Part 9: Key delivery bundle

ICS 35.040; 37.060.99

National foreword

This British Standard is the UK implementation of ISO 26430-9:2009.

The UK participation in its preparation was entrusted to Technical Committee CPW/36, Cinematography.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 30 June 2010

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 26430-9 was prepared by the Society of Motion Picture and Television Engineers (as SMPTE 430-9-2008) and was adopted, under a special “fast-track procedure”, by Technical Committee ISO/TC 36, *Cinematography*, in parallel with its approval by the ISO member bodies.

ISO 26430 consists of the following parts, under the general title *Digital cinema (D-cinema) operations*:

- *Part 1: Key delivery message* [equivalent to SMPTE 430-1]
- *Part 2: Digital certificate* [equivalent to SMPTE 430-2]
- *Part 3: Generic extra-theater message format* [equivalent to SMPTE 430-3]
- *Part 4: Log record format specification* [equivalent to SMPTE 430-4]
- *Part 5: Security log event class and constraints* [equivalent to SMPTE 430-5]
- *Part 6: Auditorium security messages for intra-theater communications* [equivalent to SMPTE 430-6]
- *Part 9: Key delivery bundle* [equivalent to SMPTE 430-9]

Introduction

This part of ISO 26430 comprises SMPTE 430-9-2008 and Annex ZZ (which provides equivalences between ISO standards and SMPTE standards referenced in the text).

Foreword

SMPTE (the Society of Motion Picture and Television Engineers) is an internationally-recognized standards developing organization. Headquartered and incorporated in the United States of America, SMPTE has members in over 80 countries on six continents. SMPTE's Engineering Documents, including Standards, Recommended Practices and Engineering Guidelines, are prepared by SMPTE's Technology Committees. Participation in these Committees is open to all with a bona fide interest in their work. SMPTE cooperates closely with other standards-developing organizations, including ISO, IEC and ITU.

SMPTE Engineering Documents are drafted in accordance with the rules given in Part XIII of its Administrative Practices.

SMPTE Standard 430-9 was prepared by Technology Committee DC28.
