

BSI Standards Publication

Plain bearings — Thin-walled half bearings with or without flange

Part 2: Measurement of wall thickness and flange thickness

National foreword

This British Standard is the UK implementation of [ISO 3548-2:2020](#). It supersedes [BS ISO 3548-2:2009](#), which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee MCE/12, Plain bearings.

A list of organizations represented on this committee can be obtained on request to its committee manager.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definition	1
4 Symbols and units	2
5 Purpose of checking	2
6 Checking methods	3
6.1 Measuring principle of wall thickness	3
6.2 Line measurement around the circumference	3
6.3 Line measurement in axial direction	4
6.4 Point measurement	5
6.5 Grading of bearings	7
6.6 Eccentric bore	7
6.7 Measuring principle for flange thickness	7
6.8 Measuring point for flange thickness	8
7 Requirements for measuring equipment and specimen for the contact method	8
7.1 Tip-radius for measuring pin on the outside surface	8
7.2 Tip-radius for measuring pin on the inside surface	8
7.3 Measuring pin load	8
7.4 Set-up	8
7.5 Periodical control	8
7.6 Measurement failures on the inside and/or outside surface	9
8 Checking of measuring equipment	9
Bibliography	10

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 123, *Plain Bearings*, Subcommittee SC 5, *Quality analysis and assurance*.

This second edition cancels and replaces the first edition (ISO 3548-2:2009), which has been technically revised. The main changes compared to the previous edition are as follows:

- the term “flange thickness” has been introduced in [Clause 3](#);
- [Table 1](#) has been updated;
- several figures have been revised;
- a new [Table 3](#) “Thin walled half bearings with flange — Distance to measuring position a_{ch} ” has been introduced.

A list of all parts in the ISO 3548 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
