National foreword

This British Standard reproduces verbatim ISO 362:1998 and implements it as the UK national standard. It supersedes BS 3425:1966 which is withdrawn. The UK participation in its preparation was entrusted to Technical Committee EH/1, Acoustics, to subcommittee EH/1/2, Traffic noise, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO title page, pages ii to iv, pages 1 to 8 and a back cover. This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Amendments issued since publication

Amd. No.	Date	Comments
10411 Corrigendum	January 1999	Indicated by a sideline in the margin

This British Standard, having been prepared under the direction of the Health and Environment Sector Committee, was published under the authority of the Standards Committee and comes into effect on 15 December 1998

Acoustics — Measurement of noise emitted by accelerating road vehicles — Engineering method

*Acoustique — Mesurage du bruit émis par les véhicules routiers en
accélération — Méthode d'expertise*

Contents

	Page
Foreword	iii
1 Scope	1
2 Normative references	1
3 Definitions	1
4 Vehicle categories	1
5 General considerations	2
5.1 Driving conditions	2
5.2 Interpretation of results	2
6 Instrumentation	2
6.1 Instruments for acoustical measurement	2
6.2 Instrumentation for speed measurements	2
6.3 Meteorological instrumentation	2
7 Acoustical environment, meteorological conditions and background noise	2
7.1 Test site	2
7.2 Meteorological conditions	3
7.3 Background noise	4
8 Procedure	4
8.1 Microphone positions	4
8.2 Number of measurements	4
8.3 Conditions of the vehicle	4
8.4 Operating conditions	4
8.5 Readings to be taken and reported values	6
8.6 Measurement uncertainty	7
9 Test report	7
Annex A (informative) Measurement uncertainty	8
Annex B (informative) Bibliography	8
Figure 1 — Test site dimensions	3

Descriptors: Acoustics, road vehicles, acceleration, noise (sound), engine noise, tests, acoustic tests, acoustic measurements, testings conditions.
