

Measurement of water flow in closed conduits — Meters for cold potable water

Part 2: Installation requirements and selection

ICS 17.120.10

National foreword

This British Standard reproduces verbatim ISO 4064-2:2001 and implements it as the UK national standard. It supersedes BS 5728-2:1980 which is withdrawn.

The UK participation in its preparation was entrusted by Technical Committee CPI/30, Measurement of Fluid Flow in Closed Conduits, to Subcommittee CPI/30/7/1, Liquid meters (water), which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i to iv, pages 1 to 7 and a back cover.

The BSI copyright date displayed in this document indicates when the document was last issued.

This British Standard, having been prepared under the direction of the Sector Policy and Strategy Committee for Materials and Chemicals, was published under the authority of the Standards Policy and Strategy Committee on 7 September 2001
