

Petroleum and liquid petroleum products — Measurement of level and temperature in storage tanks by automatic methods —

Part 6: Measurement of temperature in pressurized storage tanks (non-refrigerated)

ICS 75.180.30

National foreword

This British Standard reproduces verbatim ISO 4266-6:2002 and implements it as the UK national standard. Together with BS ISO 4266:2002 Parts 1 to 5, it supersedes BS 7812:1995 which is withdrawn.

The UK participation in its preparation was entrusted by Technical Committee PTI/12, Petroleum measurement and sampling, to Subcommittee PTI/12/1, Static and dynamic petroleum measurement, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.
