

Iron ores — Determination of aluminium —

Part 1: Flame atomic absorption spectrometric method

ICS 73.060.10

National foreword

This British Standard reproduces verbatim ISO 4688-1:2006 and implements it as the UK national standard. It supersedes BS 7020-8.2:1993 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee ISE/58, Iron ores, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the ISO title page, pages ii to iv, pages 1 to 11 and a back cover.

The BSI copyright notice displayed in this document indicates when the document was last issued.

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 31 August 2006

Foreword	iv
1 Scope	1
2 Normative references	1
3 Principle	1
4 Reagents	2
5 Apparatus	2
6 Sampling and samples	3
6.1 Laboratory sample	3
6.2 Preparation of predried test samples	3
7 Procedure	3
7.1 Number of determinations	3
7.2 Test portion	4
7.3 Blank test and check test	4
7.4 Determination	4
8 Expression of results	6
8.1 Calculation of mass fraction of aluminium	6
8.2 General treatment of results	6
8.3 Oxide factor	8
9 Test report	8
Annex A (normative) Flowsheet of the procedure for the acceptance of analytical values for test samples	9
Annex B (informative) Derivation of repeatability and permissible tolerance equations	10
Annex C (informative) Precision data obtained by international analytical trials	11

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 4688-1 was prepared by Technical Committee ISO/TC 102, *Iron ore and direct reduced iron*, Subcommittee SC 2, *Chemical analysis*.

This second edition cancels and replaces the first edition (ISO 4688-1:1992), which has been technically revised. It has been updated to alter the manner in which precision data are presented.

ISO 4688 consists of the following parts, under the general title *Iron ores — Determination of aluminium* :

— *Part 1: Flame atomic absorption spectrometric method*
