

BSI Standards Publication

Steel sheet, hot-rolled, of structural quality with improved atmospheric corrosion resistance

National foreword

This British Standard is the UK implementation of ISO 5952:2019. It supersedes BS ISO 5952:2011, which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee ISE/109, Coated and Uncoated Flat Products to be Used for Cold Forming.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

ICS 77.140.50

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 31 January 2019.

Amendments/corrigenda issued since publication

Date	Text affected
------	---------------

**Steel sheet, hot-rolled, of structural
quality with improved atmospheric
corrosion resistance**

*Tôles en acier de construction laminées à chaud en continu à
résistance améliorée à la corrosion atmosphérique*

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Dimensions	2
5 Conditions of manufacture	2
5.1 Steelmaking.....	2
5.2 Chemical composition.....	2
5.3 Chemical analysis.....	2
5.3.1 Heat analysis.....	2
5.3.2 Product analysis.....	3
5.4 Mechanical properties.....	4
5.5 Application.....	4
5.6 Weldability.....	4
5.7 Surface condition.....	4
5.8 Oiling.....	4
5.9 Corrosion resistance.....	4
5.10 Dimensional and shape tolerances.....	4
6 Tensile test sampling	4
7 Tensile test method	5
8 Retests	6
8.1 Machining and flaws.....	6
8.2 Elongation.....	6
8.3 Additional tests.....	6
9 Resubmission	6
10 Workmanship	6
11 Inspection and acceptance	6
12 Coil size	7
13 Marking	7
14 Information to be supplied by the purchaser	7
Annex A (informative) Guidelines for estimating the atmospheric corrosion resistance of low-alloy steels	8
Annex B (informative) Additional information for the use of steel with improved atmospheric corrosion resistance	10

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 17, *Steel*, Subcommittee SC 12, *Continuous mill flat rolled products*.

This fifth edition cancels and replaces the fourth edition (ISO 5952:2011), which has been technically revised.

The main changes compared to the previous edition are as follows:

- tables have been updated throughout for clarity;
- additional editorial changes for clarity.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
