

Blanks for superabrasive cutting-off wheels —

Part 1: Manually guided cutting-off in building and civil engineering

ICS 25.100.70

National foreword

This British Standard was published by BIS. It is the UK implementation of ISO 6105-1:2004. Together with BS ISO 6105-2:2004 it supersedes BS 2064-3:1990 which is withdrawn. Together with BS ISO 6105-2:2004 and BS ISO 6104:2005 it supersedes BS 2064-1:1976 and BS 2064-2:1976 which are withdrawn.

The UK participation in its preparation was entrusted to Technical Committee MTE/13, Grinding wheels, abrasive tools, paper, cloths, and powders.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 23 November 2004

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 6105-1 was prepared by Technical Committee ISO/TC 29, *Small tools*, Subcommittee SC 5, *Grinding wheels and abrasives*.

This first edition of ISO 6105-1, together with ISO 6105-2, cancels and replaces ISO 6105:1988, the contents of which have been technically revised.

ISO 6105 consists of the following parts, under the general title *Blanks for superabrasive cutting-off wheels*:

- *Part 1: Manually guided cutting-off in building and civil engineering*
- *Part 2: Hand-held cutting-off in building and civil engineering*
