

Micrographics — Vocabulary —

Part 5: Quality of images, legibility, inspection

ICS 01.040.37; 37.080

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Documentation Standards Committee (DOT/-) to Technical Committee DOT/16, upon which the following bodies were represented:

- British Broadcasting Corporation
- British Coal Corporation
- British Computer Society
- British Micrographics Manufacturers' Association
- British Photographic Association
- Business Equipment and Information Technology Association
- Drawing Office Material Manufacturers' and Dealers' Association
- Electronic Engineering Association
- Her Majesty's Stationery Office
- Ministry of Defence
- National Association of Microfilm Bureaux
- National Centre for Information Media and Technology (Cimtech)
- Oil and Chemical Plant Constructors' Association
- Society of British Aerospace Companies
- Standing Conference of National and University Libraries

The following body was also represented in the drafting of the standard, through sub-committees and panels:

Her Majesty's Treasury

This British Standard, having been prepared under the direction of the Documentation Standards Committee, was published under the authority of the Board of BSI and comes into effect on 29 April 1988

National foreword

This Part of BS 6054 has been prepared under the direction of the Documentation Standards Committee and is identical with ISO 6196-5:1987 “*Micrographics — Vocabulary — Part 05: Quality of images, legibility, inspection*”, published by the International Organization for Standardization (ISO).

Terminology and conventions. The text of the International Standard has been approved as suitable for publication as a British Standard without deviation. Some terminology and certain conventions are not identical with those used in British Standards; attention is drawn especially to the following.

Wherever the words “ISO 6196”, “part of ISO 6196” or “International Standard” appear, referring to this standard, they should be read as “BS 6054” or “Part of BS 6054” as appropriate.

In British Standards it is current practice to use the spelling “thiosulphate” instead of “thiosulfate”.

Cross-reference

International Standard	Corresponding British Standard
ISO 3166:1981	BS 5374:1981 <i>Specification for codes for the representation of names of countries</i> (Identical)

There is no British Standard corresponding to ISO R/1087 but, as the reference is purely informative, it does not affect the validity of this British Standard.

Additional information. This standard is the national implementation of ISO 6196-5:1987; as such, only the English text has been reproduced. If the French text, Russian text and equivalent German terms are required, reference should be made to the original ISO publication.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
