National foreword

This British Standard is the UK implementation of ISO 6266:2013.

The UK participation in its preparation was entrusted to Technical Committee SW/136/7, Snowsports equipment.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	2
5 Apparatus	2
5.1 Bending machine	2
5.2 Measuring device for bottom camber height	4
5.3 Measuring device for centre spring constant	4
6 Test specimens	4
6.1 Lengths	4
6.2 Number	5
7 Temperatures for conditioning and testing	5
8 Procedure	5
8.1 Measurement of original bottom camber height, h_B	5
8.2 Measurement of original centre spring constant, c_M	5
8.3 Determination	5
8.4 Measurement of final bottom camber height, h'_B	6
8.5 Measurement of final centre spring constant, c'_M	6
8.6 Assessment of damage	6
9 Expression of results	6
9.1 Fatigue index for bottom camber height	6
9.2 Fatigue index for centre spring constant	6
10 Test report	7

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 6266 was prepared by Technical Committee ISO/TC 83, *Sports and recreational equipment*, Subcommittee SC 4, *Snowsports equipment*.

This second edition cancels and replaces the first edition (ISO 6266:1980), which has been technically revised.
