Committees responsible for this British Standard

The preparation of this British Standard was entrusted by Technical Committee MCE/18, Fluid power systems and components, to Subcommittee MCE/18/3, Cylinders, upon which the following bodies were represented:

- Association of British Mining Equipment Companies
- British Compressed Air Society
- British Fluid Power Association
- British Iron and Steel Producers' Association
- Processing and Packaging Machinery Association

This British Standard, having been prepared under the direction of the Engineering Sector Board, was published under the authority of the Standards Board and comes into effect on 15 September 1996

National foreword

This British Standard reproduces verbatim ISO 6432:1985 and implements it as the UK national standard. It supersedes BS 4862-1:1983 which is withdrawn.

This British Standard is published under the direction of the Engineering Sector Board whose Subcommittee MCE/18/3 has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international committee any queries on interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

NOTE International and European Standards, as well as overseas standards, are available from Customer Services, BSI, 389 Chiswick High Road, London W4 4AL.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO title page, pages 1 to 4, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
