National foreword

This British Standard reproduces verbatim ISO 690-2:1997 and implements it as the UK national standard.

The UK participation in its preparation was entrusted by Technical Committee IDT/2, Information and documentation, to Subcommittee IDT/2/1, Bibliographic references and descriptions, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

Additional Information

In the UK, this standard is supplementary to BS 1629:1989(1998), which deals with all other published material. Readers making use of BS ISO 690-2 should employ the term “originator” (from BS 1629) where this standard uses “author”, to ensure consistency with citing and referencing other media by making use of BS 1629.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO title page, pages ii to iv, pages 1 to 16 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

This British Standard, having been prepared under the direction of the DISC Board, was published under the authority of the Standards Committee and comes into effect on 15 December 1998

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 690-2 was prepared by Technical Committee ISO/TC 46, *Information and documentation*, Subcommittee SC 9, *Presentation, identification and description of documents*.

ISO 690 consists of the following parts, under the general title *Information and documentation — Bibliographic references*:

— ISO 690: *Documentation — Bibliographic references — Content, form and structure*

NOTE ISO 690 will be revised as ISO 690-1.

— *Part 2: Electronic documents or parts thereof.*

Annex A of this part of ISO 690 is for information only.
