National foreword

This British Standard has been prepared by Technical Committee TCI/78, Coated fabrics. It is identical with ISO 7229:1997 *Rubber- or plastics-coated fabrics — Measurement of gas permeability* published by the International Organization for Standardization (ISO).

Coated fabrics are employed for a wide variety of end-uses, from protective/safety clothing materials to building and civil engineering. Each of these end-uses has its own special requirements in respect of the level of permeability of various gases, liquids or chemicals, e.g. helium for balloons, CO₂ for inflatable life-rafts.

Users may also wish to refer to BS 903-A30.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO title page, page ii, pages 1 to 3 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Amendments issued since publication

Amd. No.	Date	Comments

This British Standard, having been prepared under the direction of the Sector Board for Materials and Chemicals, was published under the authority of the Standards Board and comes into effect on 15 June 1997
