Foreword

This British Standard is the UK implementation of ISO 8727:1997+A1:2015. It supersedes BS ISO 8727:1997 which is withdrawn.

The start and finish of text introduced or altered by amendment is indicated in the text by tags. Tags indicating changes to ISO text carry the number of the ISO amendment. For example, text altered by ISO amendment 1 is indicated by A1 A1.

A list of organizations represented on this committee can be obtained on request to its secretary.

The UK participation in its preparation was entrusted by Technical Committee GME/21, Mechanical vibration, shock and condition monitoring.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard, having been prepared under the direction of the Engineering Sector Board, was published under the authority of the Standards Board and comes into effect on 15 December 1997

Mechanical vibration and shock — Human exposure — Biodynamic coordinate systems

Vibrations et chocs mécaniques — Exposition de l'individu — Systèmes de coordonnées biodynamiques

Contents

	Page
Foreword	iii
Introduction	1
1 Scope	1
A1 2 Normative references A1	1
3 Biodynamic coordinate systems	1
3.1 Direction	2
3.2 Biodynamic coordinate systems for the whole body	2
3.2.1 Whole-body anatomical coordinate system	2
3.2.2 Basicentric coordinate systems for the whole body	2
3.3 Segmental anatomical coordinate systems	3
3.3.1 Anatomical coordinate system: head	3
3.3.2 Anatomical coordinate system: root of neck	3
3.3.3 Anatomical coordinate system: upper torso	3
3.3.4 Anatomical coordinate system: pelvis	3
3.4 Biodynamic coordinate systems for the hand	4
3.4.1 Anatomical coordinate system: hand	4
3.4.2 Basicentric coordinate system for hand-transmitted force or motion	4
Annex A (informative) Diagrammatic illustrations of biodynamic coordinate systems	6
Annex B (informative) Explanatory notes concerning the anatomical frame of reference and the biodynamic coordinate systems for the hand	11
A1 Bibliography A1	11
Figure A.1 — Diagrammatic illustration of a hierarchy of biodynamic coordinate systems in a fixed location, such as a laboratory	6
Figure A.2 — Diagrammatic illustration of a hierarchy of biodynamic coordinate systems in a freely moving vehicle	7
Figure A.3 — Diagram of the normal anatomical position (anterior view, i.e. the figure is looking in the <i>x</i> -direction)	8
Figure A.4 — Diagrammatic illustration of the directions of the three axes of a right-handed orthogonal coordinate system, denoting the order of the <i>x</i> -, <i>y</i> - and <i>z</i> -axes	8
Figure A.5 — Diagrammatic illustrations (not to scale or mutually oriented) showing biodynamic coordinate systems relating directly to persons	9
A1 Figure A.6 — Coordinate systems for the hand A1	10

Descriptors: Vibration, mechanical shock, human body, exposure, coordinates, anatomy.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 8727 was prepared by Technical Committee ISO/TC 108, *Mechanical vibration and shock*, Subcommittee SC 4, *Human exposure to mechanical vibration and shock*.

Annex A to Annex C of this International Standard are for information only.
