

Implementation of
ISO 9211-2:1994

Optics and optical instruments — Optical coatings —

Part 2: Optical properties

Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee CPM/17, Fundamental aspects of optical standards, upon which the following bodies were represented:

- British College of Optometrists
- Department of Trade and Industry (National Physical Laboratory)
- Engineering Equipment and Materials Users Association
- Flat Glass Manufacturers' Association
- Institute of Physics
- Ministry of Defence
- Sira Limited
- Society of British Aerospace Companies Limited
- United Kingdom Laser and Electro-optic Association

This British Standard, having been prepared under the direction of the Consumer Products and Services Sector Board (W/-), was published under the authority of the Standards Board and comes into effect on 15 April 1995

Text of ISO 9211-2	1

National foreword

This British Standard reproduces verbatim ISO 9211-2:1994 and implements it as the UK national standard.

This British Standard is published under the direction of the Consumer Products and Services Sector Board whose whose Technical Committee CPM/17 has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international committee any enquiries on interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

NOTE International and European Standards, as well as overseas standards, are available from Customer Services, BSI, 389 Chiswick High Road, London W4 4AL.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO title page, pages ii to iv, pages 1 to 10 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Contents

	Page
Foreword	iii
1 Scope	1
2 Normative references	1
3 Definitions	1
4 Optical properties to be specified	1
5 Measurement conditions	1
6 Graphical representation of spectral characteristics	1
Annex A (informative) Example of recommended spectral geometry	6
Annex B (informative) Numerical examples of spectral graphs (recommended formats)	7
Figure 1 — Reflecting function	2
Figure 2 — Antireflecting function	3
Figure 3 — Beam splitting function	3
Figure 4 — Attenuating function	3
Figure 5 — Filtering function	4
Figure 6 — Selecting function	4
Figure 7 — Polarizing function	5
Figure 8 — Phase-changing function	5
Figure 9 — Absorbing function	5
Figure A.1 — Reflectance, collimated beam	6
Figure A.2 — Transmittance, collimated beam	6
Figure A.3 — Transmittance, conical, normal incidence	6
Figure A.4 — Transmittance, conical, oblique incidence	6
Figure A.5 — Beamsplitter, plate	6
Figure A.6 — Beamsplitter, cube	6
Figure B.1 — Reflecting function	7
Figure B.2 — Antireflecting function	8
Figure B.3 — Filtering function	9
Figure B.4 — Selecting function	10
Table 1 — Conditions and optical properties to be specified	2
