Committees responsible for this British Standard

The preparation of this British Standard was entrusted by Technical Committee CPW/42, Photography, to Subcommittee CPW/42/-/5, Physical properties and image performance of photographic chemical materials, upon which the following bodies were represented:

- British Film Institute
- British Institute of Professional Photography
- British Photographic Association
- Sira Limited

The following bodies were also represented in the drafting of the standard, through subcommittees and panels:

- British Compressed Gases Association
- Ordnance Survey
- Society of Archivists

This British Standard, having been prepared under the direction of the Consumer Products and Services Sector Board, was published under the authority of the Standards Board and comes into effect on 15 February 1996

Text of ISO 9718	1

National foreword

This British Standard reproduces verbatim ISO 9718:1995 and implements it as the UK national standard.

This British Standard is published under the direction of the Consumer Products and Services Sector Board whose Technical Committee CPW/42/-/5 has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international committee any enquiries on interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

NOTE International and European Standards, as well as overseas standards, are available from Customer Services, BSI, 389 Chiswick High Road, London W4 4AL.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO title page, pages ii to iv, pages 1 to 15 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

11 Classification for reporting	10
Annex A (normative) Preparation of standard solution of tetrabutylammonium hydroxide	11
Annex B (informative) Microfilm image quality	11
Annex C (informative) Distinction between film storage copies and work copies	13
Annex D (informative) Effects of heat and pressure	13
Annex E (informative) Effects of high humidity	13
Annex F (informative) Light-fading of vesicular images	14
Annex G (informative) Corrosiveness	14
Annex H (informative) Bibliography	15
Table 1 — Limits for tensile properties and loss in tensile properties on accelerated ageing of polyester-base film	4
Table 2 — Limits for change in image density after light-fading test	5

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 9718 was prepared by Technical Committee ISO/TC 42, *Photography*.

This second edition cancels and replaces the first edition (ISO 9718:1991), which has been technically revised.

Annex A forms an integral part of this International Standard. Annex B, Annex C, Annex D, Annex E, Annex F, Annex G and Annex H are for information only.
