National foreword

This British Standard reproduces verbatim ISO/IEC 10168-4:1996 and implements it as the UK national standard.

The UK participation in its preparation was entrusted to Technical Committee IST/21, Open Systems Interconnection, Data Management and Open Distributed Processing, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO title page, pages ii to iv, pages 1 to 16 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

This British Standard, having been prepared under the direction of the DISC Board, was published under the authority of the Standards Board and comes into effect on 15 May 1997

Foreword	iii
Introduction	1
1 Scope	1
2 Normative references	1
3 Definitions	2
3.1 Reference model definitions	2
3.2 Conformance testing methodology and framework definitions	2
3.3 Session test management protocol definitions	2
4 Symbols and abbreviations	2
5 Overview	3
6 Service assumed from the Session IUT	4
6.1 General	4
6.2 Use of parameters by service primitives	4
7 Definition of the SL-TMP	4
7.1 General procedures	4
7.2 Implicit reaction	4
7.3 Explicit reaction	5
7.3.1 Definition of SL-TMPDU sent by LT	5
7.3.2 General procedure for executing the reactions memorized in the FIFO queue	6
7.3.2.1 Use of this general procedure	6
7.3.2.2 Execution of this general procedure	6
7.3.3 Processing a valid explicit reaction	6
7.3.3.1 Processing an “Absorption of SP” reaction	8
7.3.3.2 Processing an “execute the reactions memorized in the FIFO queue” reaction	8
7.3.3.3 Processing a “Purge reactions memorized in the FIFO queue” reaction	8
7.3.3.4 Processing any other reaction	8
7.3.4 Building a reaction	9
7.3.4.1 Building parameters	9
7.3.4.2 Building User-Data	10
7.4 Service Violation	11
7.5 Protection against connection rejection by session	11
8 Coding rules	12
8.1 PDU sent by LT	12
8.1.1 Coding of REACTION parameter	13
8.1.2 Coding of RES-PAR-VAL parameter	14
8.2 Coding of the RP-SL-TMPDU	15
8.2.1 Coding of the RECEIVED-SP parameter	16
8.2.2 Coding of RECEIVED-PAR parameter	16

Descriptors: Data processing, information interchange, network interconnection, open systems interconnection, data transfer, session layer, protocols, tests, conformity tests.

Foreword

ISO (The International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

International Standard ISO/IEC 10168 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 21, *Open systems interconnection, data management and open distributed processing*.

ISO/IEC 10168 consists of the following parts, under the general title *Information technology — Open Systems Interconnection — Conformance test suite for the Session protocol*:

- *Part 1: Test suite structure and test purposes;*
- *Part 4: Test management protocol specification.*
